

Quatris Health Cloud Services

Thanks to GE' s Centricity™ Practice Solution, your practice is able to see more patients without sacrificing quality of care. Paperless insurance claims have streamlined your front office, and electronic medical records have made a world of information available at your fingertips.

All of this rich data is invaluable - but where do you store it?

Quatris Health' s secure cloud services allow you to enjoy the benefits of Centricity without having to install, configure or maintain your own database.

Our Comprehensive Cloud Service

- Industry-leading virtualization platform, vSphere by VMware
- Redundant connections with multiple ISPs for 99.99% internet availability
- One monthly fee that includes:
 - Server installation, maintenance, and upgrades performed online without interruption
 - Server licensing fees
 - Live customer support

The Quatris Cloud provides FIVE areas of "Life Support" for critical IT systems

Power

- Redundant uninterruptible power supply (UPS)

Security

- Monitored 24/7/365 by certified network engineers
- Restricted entry (photo ID required) overseen by closed-circuit TV surveillance
- Able to be monitored and administrated remotely through secure login

Connectivity

- Fully redundant in every area of connectivity, storage and server performance
- Meets industry gold standard of 99.99% availability

Fire Suppression

- Equipped with laser-based fire detection system
- Uses waterless fire suppressant agent that is harmless to humans and equipment

Cooling

- Climate-controlled at 63-67°F and 50-60% humidity
